

SPECIAL "HEART BLOCK" ADDITION TO THE SEASONAL PATCHWORK PATTERN

INTRODUCTION

- For this VALENTINE'S HEARTS version we are using the CHRISTMAS version/layout of the pattern.
- For each large tree block, sub the large heart block.
- For each small double tree block sub the small double heart block.
- To make the hearts, use our favorite SEW&FLIP method with the red [A/F] and the small ivory solid squares indicated in the cutting instructions below.
- For the patchwork pieces, use the same variety of cream prints as you would in any of the other versions of this pattern.
- For the original star blocks, we kept the blocks the same, but changed their color to tan so that they would recede into the background a bit more and let the hearts be the stars of the show! We also turned some of the star blocks 90 degrees so that the stars would fall in a slightly different spot, not touching the new heart blocks. Use your best judgement with the placement. See layout below.
